

Splashproof

- **Sealed in-line connector system**
- **Compact and waterproof for the tight applications**
 - Power mirrors, wipers and switches etc...
- **2 versions of 2, 3 & 4 circuit**
 - Standard
 - Low profile
- **Smallest sealed connector system in the industry**
 - Tested to meet Japan's JIS D0203, similar to IP56
- **Will accommodate 20 and 22awg**
- **Up to 4 amps per circuit**

Features and Benefits

- **Integrated matte seals for ease of assembly and tighter spacing between terminals**
- **User-friendly friction lock saves space and protects locking latch area**
- **Spring beam female terminal design provides high pressure and minimal deflection for high vibration applications**
- **Raised split beam male terminals for polarization and prevention of incorrect terminal insertion**
- **Tools available to close the wire cap and lock the terminals into place**
