

Power and connectivity solutions for healthcare

Facility room

Eaton offers a full line of products for every healthcare environment. See how Eaton solutions fit into facility rooms.

Power

Rack PDUs

Distribute power to rack-mount equipment. Eaton offers everything from basic PDUs to advanced models with outlet level control. Vertical (0U) and horizontal rack PDUs are available.

ATS

Provide power redundancy to equipment. If there is an issue with the primary power source, automatic transfer switch (ATS) rack PDUs automatically switch to the secondary power source.

Manage

Console KVM

Control multiple servers from a single console with a KVM switch, keyboard, touchpad and color LCD. The entire console folds like a laptop and slides into a 1U rack drawer, providing compact storage and easy access.

Protect

Network UPS system

Eaton 5PX G2 UPS systems provide the maximum power possible at ratings from 1 to 3 kVA. Add up to four optional external battery modules for extra runtime.

Desktop UPS system

Provide battery backup power for individual workstations, PCs and other electronics.

Connect

Cables and connectivity*

Provide fast and reliable copper network connections. Choose from hundreds of cables, patch panels and other solutions. Fiber network solutions are available.

Laptop docking station*

Add a variety of ports, including video, USB and Ethernet ports, to laptops using a single USB-C or USB-A connection.

*To promote a healthier environment for patients and staff, Safe-IT™ antimicrobial and antibacterial options are available for select models.

House

Floor-standing racks and enclosures

Organize 19-inch rack-mount equipment in mission-critical applications. Open frame racks and locking enclosures are available in a wide range of heights and depths.

Wall-mount enclosure

Secure and organize IT equipment in locations with limited floor space.

Cable management

Manage cables for better organization and airflow through racks. Eaton offers systems for copper, fiber and power cables, including cable tray, fiber routing systems, cable managers and cable ladders.

Cool

In-row cooling

Precision cooling eliminates hot spots, prevents hot/cold mixing, reduces energy consumption and increases cooling capacity. Portable and rack-mount cooling units are also available.
