

Molex Showcases High Quality Solutions for Marine Industry at IBEX

Battery Powered Hand Tool Innovative solutions designed to meet the needs of the marine industry

LISLE, Ill. September 28, 2010 – Molex Incorporated will be exhibiting its line of marine focused products at the International BoatBuilders' Exhibition and Conference (IBEX) in Louisville, Kentucky, September 28-30. Molex has been developing products and solutions for the marine industry for more than 15 years. Its products are specially designed for harsh environments, are properly sealed to prevent corrosion and can be submerged or located in a bilge.

In addition to supplying connectors to the marine industry, Molex offers tools specifically designed to work with its connectors to deliver the highest quality solution. Products that will be on display include:

- Molex ServiceGrade™ Ratchet Hand Crimp Tool: This high quality, affordable hand tool offering crimps many terminals and splices and has been tested to 10,000 full cycles, perfect for low-volume field repairs.
- Molex PremiumGrade™ Ratchet Hand Crimp Tool: Sturdy construction and comfortable, anti-slip handle grips make this durable ratcheting tool perfect for production lines, and it has been tested to 50,000 full cycles.
- Molex Battery Powered Tools: Producing consistent, high-quality crimp terminations, this tool provides users with increased production flexibility and reduces potential quality issues, operator cycling errors and manufacturing down time. To allow better access in difficult working conditions, it is designed with multiple, interchangeable crimp-heads that rotate 360°.
- Perma-Seal™ – Perma-Seal terminals and splices provide long-lasting, moisture-proof connections that withstand water, salt, condensation, corrosion and heat, all of which cause serious problems for conventional, unsealed splices.

Molex is committed to designing connectors and tooling for the highest quality systems," said Molex product manager Bob Grenke. "Our innovative products are designed to meet the specific needs of marine manufacturers. By providing the connectors and the tooling specifically designed for those products, Molex provides assurance to marine manufacturers that their systems will work properly."

Molex has participated in IBEX since its inception to support the growing needs of marine transportation manufacturers. Molex distributors for marine transportation solutions include Heilind Electronics, TTI, Inc., Wes-Garde Components Group, Inc and Pacer Marine.
